Bright, high-gloss wall tile for sanitary areas.

Figure 1: Representative image of the Commercial Wall Gloss tile.

The **Commercial Wall Gloss** tile is designed to meet the rigorous hygiene and aesthetic demands of commercial vertical applications, such as restrooms, healthcare facilities, and food preparation areas. This tile is engineered for **High durability** and features a brilliant gloss finish that maximizes light and simplifies maintenance.

Key Features and Benefits

Hygiene and Maintenance

The smooth, non-porous glossy surface is inherently resistant to bacterial growth and chemical cleaners, making it exceptionally **Easy clean**. This is a crucial feature for maintaining sanitary conditions as required in institutional and public settings. The finish allows grime and residue to be wiped away quickly without the need for abrasive tools or harsh scrubbing.

Longevity and Compliance

Built to withstand frequent washing and impacts, this commercial-grade tile ensures longevity in high-wear environments. Its robust construction and stable glaze prevent chipping and surface degradation over time. The high-gloss finish reflects light beautifully, contributing to a bright, spacious, and professional atmosphere that aligns with modern commercial design standards.
