

# Product Specification Sheet: Living Room Marble Look

Tile Specification Team

November 18, 2025

## Product Overview: Living Room Marble Look

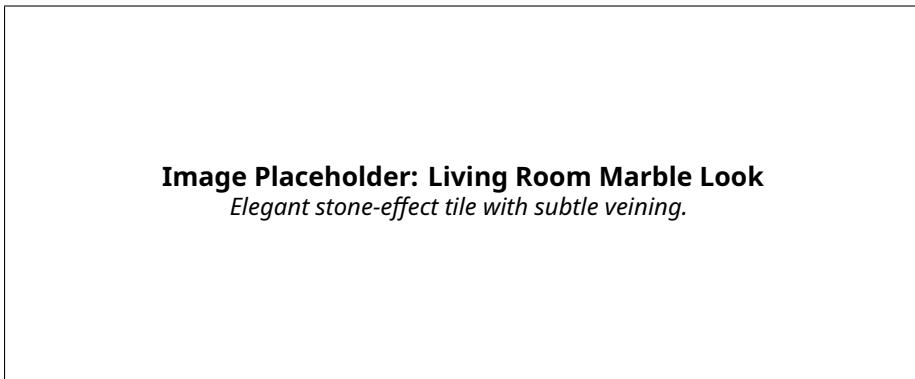

Figure 1: Representative image of the Living Room Marble Look tile series.

The **Living Room Marble Look** tile series offers the timeless luxury of natural stone without the associated cost or maintenance demands. This tile features a sophisticated **Stone textured design** that perfectly replicates the deep veining and varied tones of authentic marble. It is specifically curated for living areas, entryways, and formal rooms where a sense of opulence and enduring elegance is desired.

## Key Features and Benefits

### Aesthetic Replication and Visual Depth

The advanced printing technology utilized in this series achieves unparalleled realism, capturing the inherent complexity and depth found in natural marble slabs. The textured surface adds a tactile element that further enhances the stone illusion, while also offering improved slip resistance compared to polished finishes. This marble-look tile provides a seamless transition between rooms and acts as a neutral, yet highly luxurious, backdrop for any furniture style or decor.

### Durability and Practicality

Unlike natural marble, which is porous and susceptible to staining and etching, this porcelain or ceramic interpretation is non-porous and highly resistant to daily wear and tear. This makes it an incredibly practical choice for high-traffic living areas. Its high durability ensures that the luxurious appearance remains intact for many years, offering a low-maintenance, long-lasting flooring solution that successfully fuses high-end style with everyday functionality.
